PROFILE

I am currently studying Computer Science Engineering at Parul University, specializing in front-end web development and UI/UX design. My expertise lies in HTML, CSS, JavaScript, React.js, and MongoDB, complemented by a foundational understanding of design tools such as Figma and Framer. Crafting user-friendly and visually captivating web applications is my driving passion.

EXPERIENCE

PRISM I.T. SYSTEMS, SURAT

REACTJS DEVELOPER INTERN

- Completed a summer internship as a ReactJS Developer at Prism IT Systems.
- Developed and enhanced web applications using ReactJS, focusing on state management and hooks.
- Implemented features and resolved issues in real-world projects, gaining valuable hands-on experience.
- Collaborated in an agile team environment, utilizing version control and collaborative coding practices.
- Received mentorship and feedback from industry professionals, improving coding skills and practices.

SKILLS

- HTML
- CSS
- JavaScript
- React.Js
- GitHub
- BootstrapCSS
- MongoDB
- Figma
- Excel sheet
- Powerpoint

EDUCATION

Parul Institute of Engineering and Technology

Bachelor of Technology

2021-current

Currently in 7th semester with an aggregate CGPA of 6.65

Shiv Jyoti international school, Kota

Higher Secondary

2020-2021

Scored 89.4% from the CBSE board with subjects as PCM

Agarwal Vidya Vihar school, Surat

Secondary Schooling

2018-2019

Scored 93% from the CBSE board

PROJECTS

- **EduEnroll - Seamless Enrollment management system**
  - **Description**: A front-end student management system built using React, featuring user authentication, student enrollment, and profile management. Utilizes React Router for seamless navigation and local storage for data persistence, providing an intuitive interface for managing student data efficiently.
  - **Tech Used**: React, React Router, Bootstrap, Local Storage, Create React App, Babel, Webpack.

- **NewsMonkey - Your Daily Dose of Global News**
  - **Description**: NewsMonkey is a React-based web app that delivers real-time news from various categories and countries using the News API. It features dynamic routing with React Router, infinite scrolling for seamless content loading, and a sleek, responsive design with Bootstrap. The app allows users to select news based on categories and countries, and includes a progress bar for enhanced user experience.
  - **Tech Used**: React, React Router, JavaScript, Fetch API, PropTypes, Infinite Scroll, React Top Loading Bar, Bootstrap, and environment variables.

- **TextUtils: Versatile Tool for Text Transformation**
  - **Description**: Developed a text manipulation utility using ReactJS and Bootstrap CSS. Features include text case conversion, text copying, clearing, space removal, and dark mode. Integrated React Router DOM for smooth navigation between pages.
  - **Tech Used**: ReactJS, Bootstrap CSS and React Router DOM
